Split Symbols Feature

In **Fort Knox Cats**, each Cat Symbol has a single and double symbol version. Single symbols have 1 cat on them. Double symbols, which use the *Split Symbols* feature, have 2 of the same cat on them. Single and double versions of each cat may appear on every reel. Winning outcomes are

based on the number of matching cats on a payline (from left to right), not just the number of matching symbols. Match as few as 3 cats and as many as 10 cats for huge wins. Similarly, 3-symbol or 4-symbol wins may be awarded on just the first 2 reels.

In the *Split Symbols* feature, the Logo Symbol is wild and substitutes for all symbols except Paw and Double Paw Symbols. When substituting for any Cat Symbol, Logo Symbols are always evaluated using the *Split Symbols* feature - making these wild symbols worth 2 matching Cat Symbols.

Fort Knox Bonus

The **Fort Knox Bonus** may be randomly triggered on any base game spin that does not trigger the *Free Spins Bonus*.

Collect 3 matching symbols to win the corresponding Platinum, Gold, Silver, or Copper prize.

If a stack of cash is revealed, the boost meter is filled a random amount. If the boost meter breaches the first level, the Platinum, Gold, Silver, and Copper prize values are boosted. Boosts are added to the value of the prize.

If the boost meter breaches the second level, the Platinum, Gold, Silver, and Copper prize values are boosted again.

If both the first and second boost levels are breached on a single pick, the award values are increased by both the first and second level boost values.

If the third boost level is breached, the Fort Knox Jackpot is awarded.

Boost values and the Platinum, Gold, Silver, and Copper reset values are multiplied by the coin value.

Only 1 prize can be awarded.

Platinum, Gold, Silver, and Copper prize values reset after every bonus.

Free Spins Bonus

The *Free Spins Bonus* is triggered when 5 or 6 scattered paw prints appear anywhere on the reels. Paw and Double Paw Symbols appear on reels 2, 3, and 4 only.

Paw Symbols appear either as single symbols or double symbols which use the *Split Symbols* feature. 2 Double Paw Symbols and 1 Single Paw Symbol equal 5 paw prints. 3 Double Paw Symbols equal 6 paw prints.

Revealing 5 paw prints awards 5 free spins. 6 paw prints awards 10 free spins.

Reels used in the *Free Spins Bonus* are different from the reels used in the base game.

Free spins are played at same coin value as the triggering spin.

The *Free Spins Bonus* cannot be retriggered.

Rules

Misuse or malfunction voids all pays and plays.

All line win symbols must appear on a played line and on consecutive reels, beginning with the far-left reel.

Only the highest winner is paid on each payline. Line wins are multiplied by the coin value on the winning line. Coinciding line wins on different paylines are added.

Scatter wins are independent from line wins and are added to the total amount paid.

The *Split Symbols* feature counts for 2 of that symbol in a winning outcome.

A winning outcome of Cat Symbols is based on the number of matching cats on that payline starting from left to right.

The Logo Symbol is wild and substitutes for all symbols except Paw and Double Paw Symbols.

Logo Symbols substitute using the *Split Symbols* feature when part of a winning outcome of cats.

Paw and Double Paw Symbols appear on reels 2, 3, and 4 in the base game only.

Bonus wins are independent from line wins and are added to the total amount paid.

Only 1 Platinum, Gold, Silver, or Copper prize can be won during the same *Fort Knox Bonus*.

The Jackpot is a shared progressive. The growth is funded by a fixed percentage of each bet placed by all players.

The likelihood of winning the Jackpot or bonus awards is not equal.

The odds of winning the Jackpot are proportional to the actual bet amount within an accuracy of 0.1%.

The amount paid for the Jackpot is approximately the amount seen on the progressive meter when the win occurs. Potentially, the awarded progressive could be somewhat higher because of display delays. In an exceptionally rare case, 2 players may simultaneously win the same progressive. The order of winners is determined solely by the timestamp applied to each transaction request as it is received by our servers. The official winning outcome belongs to the player whose transaction timestamp is first. The player whose timestamp is second will win the progressive re-seed amount if their winning outcome occurred just after the other player's win, but before the meter was able to reset.

Wins are shown in currency.

In some jurisdictions, regardless of bet size, there may be an award cap on any single transaction. See the payable for details. A transaction includes the results of the bonus, plus the outcome which launched the bonus. If the award cap is reached in the bonus, the bonus ends immediately, even if there are remaining free spins.
