

Keno MultiPlay

HOW TO PLAY

Introduction

Keno MultiPlay™ is a standard, single player Keno where you select from 2 to 10 numbers (picks), press 'Play', and 20 numbers are randomly drawn from the range 1 to 80. The more numbers drawn that match the numbers you selected, the more you can win (see Paytable section below).

In Keno MultiPlay you can choose to play 1, 2, 3, or 4 Keno draws at the same time. Switch between Single view or Multiplay™ view to view one card or all 4 cards simultaneously (Desktop version only).

How to Bet

Use the A, B, C, and D buttons to switch between each of the four Keno cards. The grid will change color to show which card you are currently betting on. Card A is Blue, card B is Green, card C is Red, and card D is Purple.

Choose between 2 to 10 numbers on any of the 80-number cards by clicking the desired number on the grid. The number will change background and show a letter that indicates which card you have selected that number for.

To deselect a number, make sure you select the correct card where you originally selected the number, then click an already-selected number to deselect it. You can select or deselect multiple numbers by pressing, or dragging your cursor, or finger, over the numbers.

Drawing Numbers

Once you have selected your desired numbers on the grid, press the Play button to start the game. The game will randomly draw 20 numbers between the range of 1 to 80.

When a drawn number lands on a number on the grid that has not been selected, the number on the grid will change to a distinct color. If the drawn number lands on a number you selected, the number will also change color but to a different color than for an unselected number.

How to Win

Winnings are paid according to the Paytable with the amount paid depending on how many numbers you have selected and how many of your selected numbers match the drawn numbers.

Winning payouts are indicated in the Paytable on screen which automatically adjusts based on the amount of numbers you have selected and your game stake.

Paytable

Paytable

Pick 2		
Match	Payout	Probability
2 on 2	15.00	1 in 17
Pick 3		
Match	Payout	Probability
2 on 3	2.00	1 in 8
3 on 3	47.00	1 in 73
Pick 4		
Match	Payout	Probability
2 on 4	1.00	1 in 5
3 on 4	11.00	1 in 24
4 on 4	80.00	1 in 327
Pick 5		

Match	Payout	Probability
2 on 5	1.00	1 in 4
3 on 5	2.00	1 in 12
4 on 5	21.00	1 in 83
5 on 5	375.00	1 in 1 551

Pick 6

Match	Payout	Probability
0 on 6	1.00	1 in 6
3 on 6	1.00	1 in 8
4 on 6	10.00	1 in 36
5 on 6	88.00	1 in 324
6 on 6	650.00	1 in 7 753

Pick 7

Match	Payout	Probability
0 on 7	1.00	1 in 9
3 on 7	1.00	1 in 6
4 on 7	4.00	1 in 20
5 on 7	25.00	1 in 116
6 on 7	260.00	1 in 1 366
7 on 7	850.00	1 in 40 980

Pick 8

Match	Payout	Probability
-------	--------	-------------

0 on 8	1.00	1 in 12
3 on 8	1.00	1 in 5
4 on 8	3.00	1 in 13
5 on 8	12.00	1 in 55
6 on 8	40.00	1 in 423
7 on 8	400.00	1 in 6 233
8 on 8	1500.00	1 in 230 115
Pick 9		
Match	Payout	Probability
0 on 9	1.00	1 in 16
4 on 9	2.00	1 in 9
5 on 9	8.00	1 in 31
6 on 9	35.00	1 in 175
7 on 9	250.00	1 in 1 691
8 on 9	850.00	1 in 30 682
9 on 9	2000.00	1 in 1 380 688
Pick 10		
Match	Payout	Probability
1 on 10	1.00	1 in 22
4 on 10	2.00	1 in 7
5 on 10	5.00	1 in 20
6 on 10	16.00	1 in 88

	<p>Speed Drag to change the speed of the drawn numbers from Normal to Fast</p>
	<p>Game settings Access additional game settings, such as audio settings.</p>
	<p>Info Display game's rules.</p>

Max Win

Any combination of wins in a single game, independently of cards used, is limited and will not exceed \$250,000.00. It may not be possible to reach this limit in a single game from every bet configuration.

Terms and Return to Player

The theoretical average return to player (RTP) is between 90.19% to 93.81% depending on how many numbers are picked on a single card. This RTP represents the long- term expected payback of the game.

In the event of a game in real play being interrupted, (i.e. started but not completed due to connectivity issues or accidentally closing the browser, etc.), depending on the previous state of the game, it will either resume from the point of the last draw or display the outcome of the game which was in play. Any winnings will be correctly credited to your account and will be exact according to the result prior to the game being interrupted.

In the event of equipment failure or planned/unplanned terminations, progressive jackpot parameters, (including jackpot values and incremental percentages), are fully restored with identical parameters, after the restart.

The odds of getting a particular outcome are always the same at the start of every game. The odds do not vary based on prior outcomes, bet size, balance size, numbers picked, time of day, day of the week, etc. For example, if the top award is won on a given play of the game, the chances of winning the top award on the next play are exactly the same. Likewise, prior losses do not change future odds.

Malfunction voids all pays and plays.
